Completed Project Scorecards

Projects Closed, 2013-2018

This table provides life of project indicators for projects that closed between 2013-2018. Total Financial Benefits and Total Beneficiaries represent the impact achieved by a project during its implementation and in the three years following implementation. Percent Women is the average women reached during the period of the project's impact. Finance mobilized accounts for the finance generated during active implementation only. The Return on Investment (ROI) describes the value we've provided to TechnoServe beneficiaries for each dollar we spend on the project.

Projects Closed, 2013-2018

This table provides life of project indicators for projects that closed between 2013-2018. Total Financial Benefits and Total Beneficiaries represent the impact achieved by a project during its implementation and in the three years following implementation. Percent Women is the average women reached during the period of the project's impact. Finance mobilized accounts for the finance generated during active implementation only. The Return on Investment (ROI) describes the value we've provided to TechnoServe beneficiaries for each dollar we spend on the project.
